

About Me

Skilled in debugging and developing applications for multiple platforms including HTML/JavaScript/CSS, Flash, and PHP. Contributing to different community based learning resources including knowledge base articles, release readiness training and community articles, as well as maintaining a steady presence in the community via multiple social media outlets. Additional experience in contributing to multiple areas of the development lifecycle including project management, architecture, design and implementation.

Experience

Adobe

2/2009 - Present

Technical Support Engineer

Provide support for all web products, including Flash, Flash Player, Dreamweaver, Fireworks, Edge suite, and PhoneGap. Collaborate with training, documentation, and social media teams to provide customers with up to date and online resources.

Blockdot

7/2007 - 2/2009

Senior Game Developer

Provided architectural guidance on and implemented numerous Flash and web based games for top tier clients such as Microsoft, Chevrolet, and LEGO. Developed assets used for promotions of internal gaming web properties.

Yahoo

8/2005 - 7/2007

Flash Developer

Designed and developed internal and external video players for multiple Yahoo.com properties. Also developed many internal video conferencing applications, as well as helping to maintain multiple external promotional websites, web applications, and tools.
